

Registration Prefill

A simpler way to start event registration

Let participants start registration with selected details pre-filled from your own system – without manually exporting and importing participant data in Conference Manager.

Why use it?

Less typing for participants

Pre-filled information reduces effort and errors.

Faster signup flow

A smoother journey means more completed registrations.

Better control of participant categories

Send the right category or membership type automatically.

Optional notification back to your system

Receive a callback when registration is complete.

Typical use cases

Member portal

Let members register with their details pre-filled.

CRM/customer database

Use customer data to speed up event signup.

Association website

Enable seamless signup from your website.

Invited guest or VIP flow

Send pre-filled links to invited participants.

Your data stays protected

Only approved websites can send information to Conference Manager, and a security key confirms that the data comes from a trusted source.

Examples on pre-filled data

First and last name

Email

Phone number

Company

Member ID

Participant category

Example journey

A participant logs in to a member portal and clicks *Sign up*. Conference Manager opens the signup page with selected details already filled in, so the participant only needs to complete the remaining fields and submit registration.

Add Registration Prefill to your setup

Registration Prefill is available through the Conference Manager API.
